

Professur für Systembiologie / Bioinformatics Core Facility

Welcome to the online documentation wiki of the Bioinformatics groups and the Bioinformatics Core Facility(BCF). This wiki contains general information for accessing our computer systems, guidelines for working with the cluster and descriptions of bioinformatics databases and tools provided locally as well as some information for software developers and data analysts.

If you are a new user or member of the group you should start with our [Newcomers guide](#) or [How to ...](#)
